To Who this may concern

Approximately 18 months ago we had Hahns
Anthony's from PCT Bathrooms come to
completely renovate our bathroom. As we
have a brick veneer house it was necessary
to completely take out the bathroom walls which
were found to have asbestos in them. We were
very happy with the professional manner in
which Hahns disposed of the asbestos material
and not at any time did we feel our health
or safety was in danger. We were extremely
happy with the overall job done.
